

Activity: **My Superhero Profile** **(using variables)**

For students:

- 1 Open Python (Google Colab / IDE)
- 2 Make 4 variables to store superhero details:
 - Superhero's Name
 - Superhero's Power
 - Superhero's Age
 - Superhero's City
- 3 Print each variable one by one to check what they store.
- 4 Print all details together in a nice format like a superhero profile card.
- 5 Write a sentence using your variables, for example:

“My favorite hero is _____. He/She lives in _____ and has the power of _____!”
- 6 Now change the values of your variables to create a new superhero.
- 7 Share your superhero profile with the class
